Addendum to the FHL Course Application: Marine Subtidal Ecology 2018

*Please answer the questions below clearly and honestly, taking into account dives that you've made (and logged) at the time of this application – future dives don't figure in!*

***Send completed Addendum to [pema@uw.edu](mailto:pema@uw.edu).***

1. When did you first get certified for SCUBA and how many *logged* dives have you made in your life? (A minimum of 20 logged dives are required for scientific certification)

Of those total logged dives, how many were....

- made in the last 12 months?
- made in cold water? in a dry suit?
- to a depth greater than 60'?
- scientific dives? another type of professional diving?

2. What is the highest level dive certification card that you currently hold? (With what agency?)

3. Do you already have your own full kit of SCUBA gear – how long have you owned it?

4. Please describe your diving background, if any.

5. Why are you interested in taking this course? (maximum 500 words please)
