Dive Addendum to the Marine Subtidal Ecology Course Application 2026

Please answer the questions below clearly and honestly, taking into account dives that you've made (and logged) at the time of this application – future dives don't figure in!

1. When were you first certified for SCUBA and how many logged dives have you made? (A minimum of 20 logged dives are required prior to the start of the course, at least one in cold water)

Of those total logged dives, how many were....

- made in the last 12 months?

- made in cold water?

- made using a dry suit?

- made to a depth greater than 60'?

- scientific dives? another type of professional diving?

2. What dive certifications do you currently hold? Please include the certifying agencies for each certification.

3. Do you already have your own full kit of SCUBA gear (1st stage regulator, 2nd stage regulator, backup "octopus," submersible pressure gauge, and buoyancy compensation device)? If yes, please provide details on how long you have owned each piece of equipment and whether it has been serviced regularly.

4. Please briefly describe your diving background.

5. Why are you interested in taking the diving track of this course?
(you may use another sheet of paper if necessary; maximum 500 words please)

If you have any questions, please contact FHL Dive Officer Pema Kitaeff, pema@uw.edu
